

Education Values of a Science Fair

1. Science Fair is “real” science.
2. Science Fair promotes interest in science.
3. Science Fair helps the student to recognize the nature of science.
4. Science Fair provides the opportunity for the student to learn science content - in depth exploration of topics.
5. Science Fair enables the student to “do” science.
6. Science Fair provides an opportunity to learn and practice planning skills.
7. Science Fair helps develop communication skills.
8. Science Fair builds self confidence.
9. Science Fair allows for integration of many disciplines.
10. Science Fair is good for getting parents involved.
11. Science Fair generates good publicity for DeMiguel.
12. Science Fair will get the student personal recognition and appreciation.
13. Science Fair programs are growing in America.
14. Science Fair projects are legitimate, like a theme paper in English.
15. Science Fair provides opportunity for students to learn and practice problem solving skills.
16. Science Fair provides the framework for students to do further experimental research.
17. Science Fair enables the student to learn information not covered in the regular classroom.
18. Science Fair helps develop organizational and research skills.
19. Science Fair helps the student meet deadlines and helps to teach responsibility.
