

PARENT CONFERENCES

The Board believes that the educational obligations of the District go far beyond the dispersing of information in classroom instruction. Staff members are expected to take the initiative in contacting parents for conferences and to set aside time to assist students individually.

Each staff member is encouraged to make a minimum of one telephone or written contact per semester with the parents or guardian of each student in their class(es). Such contacts should stress positive characteristics of the student to the greatest extent possible. Such contact shall be in addition to regular report cards and progress reports.

At least one (1) parent-teacher conference will be scheduled for each student in kindergarten through grade six each school year. This does not preclude a parent or teacher request for a conference at any time. Each elementary principal may schedule times and days for these parent-teacher conferences in that building as deemed appropriate.

All staff members at every grade level are encouraged to initiate and schedule conferences with parents whenever they deem such conferences will benefit a student.

Teachers shall keep parents informed when students are in danger of failing.

Adopted: date of manual adoption
