

Kate Kozak

I began my first term on the Flagstaff Unified School District (FUSD) governing board in January of 2015. I ran for office because I was a product of public school and my son is currently a student at an FUSD school. The education that I received from a public school was really strong, and the one my son is currently receiving is equally as strong. I wanted to give back to the community and ensure that public education for all is the best it can be. I am a mathematics teacher at Coconino Community College and want to help ensure that all students at FUSD are career and college ready.
